## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a method of applying and monitoring an epidermal surfactant that has been applied to the skin of a person.

Group II, claim(s) 6, drawn to a method in a preferred embodiment of the invention.

Group III, claim(s) 7-25, drawn to an article for applying and monitoring a surfactant.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In invention I, the steps of placing an image along the surface of a substrate and depositing a surfactant along the surface of the substrate, wherein the image operates to indicate the quantity of the surfactant are not required by the inventions II and III. In invention II, the steps of placing an article for applying and monitoring a surfactant on various parts of the users skin and applying a rubbing force such that the surfactant is distributed along the skin of the user are not required by the inventions I and III. In invention III, the article as claimed can be used to practice other methods that are different from the methods of inventions I and II. Since inventions I-III do not require the same or corresponding special

technical features as stated above and are not related to a single general inventive concept, a thorough search and examination of all inventions presented in the application would impose a serious burden to the examiner. Accordingly, a restriction requirement as set forth above is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ren L. Yan whose telephone number is 571-272-2173. The examiner can normally be reached on 8:30am-5:00pm.
